EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE CLAIM:

- In claim 27, page 49, line 3, "a first timing generator" has been changed to -- a first timing generator --.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 1-48 are allowable over the prior art of record because none of the prior art whether taken singularly or in combination, especially when these limitations are considered within the specific combination claimed, teaches: a content addressable memory architecture comprising: a timing generator configured to generate an enable signal on an enable signal line, a plurality of load elements, among others as claimed in independent claims 1, 13, 27, coupled to the enable signal line. Method for operating the content addressable memory comprising step of loading an enable signal line to have at least the same amount of loading as a comparand signal line coupled to column of content addressable memory cells in an array of CAM cells, and among other steps as claimed in independent claim 41; transmitting a first signal on a first signal line to a timing generator, the signal line having at least the same amount of loading as a comparand signal line

Art Unit: 2818

coupled to a column of the content addressable memory cells in an array of CAM cells, and among other steps as claimed in independent claim 45.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Pereira et al. (6,697,276) disclose a content addressable memory device having hash index generator.
